

ESSENTIALS OF DATA WAREHOUSING AND DATA MINING

LAB ASSIGNMENT - 6

NAME - Kaparotu Venkata Surya Tharani

USN - 22BTRAD018

BRANCH - AI & DE

Ques - Between 2005 to 2011, find out which year had the highest CO2(k) emission World bank CO2 dataset (find the data sheet in Learning space).

Steps-

1. Use CO2kt raw data table from world_bank_co2 dataset.
2. Use data interpreter to clean the data and pivot the columns accordingly.
3. Rename pivot field names as years and rename pivot field values as values.
4. Add a data source filter for year and select years from 2005 to 2011
5. Use fields years and values in the view
